Safe People, Safe Planet

Team checklist · What we reward

EfVET Annual Conference 2026 · Brussels · Friday 23 October 2026 · 11:00–12:00 · Studio 201 A+B

No AI scoring. Every table receives a thank-you gift. At the end, everyone votes on their phone (QR 3) for the table that presented best, and the winning table receives a gift; the facilitators break ties. The four criteria below are announced at the start of the session.

The room votes on	What it means
A clear one-sentence outcome	Who should act, what they should do, where, and what would show it works.
Covers both safety and the environment	Protects people and the planet in the same task.
Practical	Something a college could really use.
Clearly presented in the time given	Task, proposed change, one unresolved objection, short and plain.

Advice (not a vote criterion): follow the steps in order and be ready on time for the challenge and the pitch.

Tick as you go

☐ Task chosen ☐ Four circles filled in ☐ Outcome, activity and observable assessment written ☐ Objection written for another table ☐ Objection received and answered ☐ One sentence written ☐ Pitch ready: task, change, one unresolved objection

What the award is, and is not

The award recognises the workshop exercise only. Every table’s proposal and objection remains part of the record. QR 1 and QR 2 are anonymous totals and are never used for awards. QR 3 is the room's vote for the table that presented best: one anonymous vote per phone, only totals shown. AI does not score, judge or rank; the room votes and the facilitators break ties.
